

Boomi and AWS

Seamless integration and innovation-built on AWS, delivered by Boomi

Enterprises are under pressure to modernize, scale globally, and integrate faster than ever—yet most are constrained by fragmented systems and slow data movement. Running Boomi on AWS changes that dynamic. Together, they deliver a cloud-native integration platform that unifies applications, data, and intelligent agents across the enterprise. With Argano organizations bring their AWS environments onto a unified platform—leveraging Boomi’s native connectors for Lambda, S3, SQS, Kinesis, and SNS to power event-driven architectures, accelerate insights, and drive intelligent automation at scale.

Our Approach

Cloud-Native iPaaS

Scale integration with agility and speed through Boomi’s cloud-native iPaaS on AWS. By deploying Boomi runtimes on Amazon EKS, Argano delivers elastic, high-performance connectivity across hybrid and multi-cloud environments—enabling continuous modernization and innovation without complexity.

Boomi Data Integration

Unify and automate data movement across AWS with Boomi Data Integration. Argano streamlines extraction, transformation, and delivery into Amazon Redshift, powering enterprise data warehousing and intelligent workflows. Integrated with Amazon Quicksight, organizations gain real-time visibility and trusted insights from a centralized, governed data ecosystem.

Unified AI Control Tower

Combine the power of Amazon Bedrock and Boomi AgentStudio to build an AI-ready integration layer—a centralized control tower that unifies data, governance, and automation. This foundation enables secure orchestration of internal and external agents, delivering scalable intelligence across the enterprise.

Benefits

- **Centralized Connectivity:** Unify applications, data, and agents across AWS for a single source of truth
- **Elastic Scalability:** Scale integrations seamlessly with Boomi runtimes deployed on Amazon EKS
- **Real-Time Intelligence:** Enable instant insights and responsiveness through event-driven architectures
- **Streamlined Data Operations:** Automate extraction, transformation, and delivery for faster decision-making
- **AI-Ready Foundation:** Extend integration into AI and automation through Boomi AgentStudio and Amazon Bedrock

Industries

- Retail
- Manufacturing
- Healthcare & Life Sciences
- High Tech & Telecom
- Financial Services
