License Optimization Services for Microsoft Dynamics 365

Minimize Costs and Maximize Services

Navigating Microsoft Dynamics 365 Finance and Supply Chain Management licensing intricacies often are complex.

Without a solid grasp of the current Dynamics 365 licensing framework and a deep understanding of its security architecture, deciphering your true licensing prerequisites can feel like a maze with no clear way out.

Often, organizations end up overspending on licenses simply due to a lack of licensing structure knowledge, or simply because they don't have the time to thoroughly scrutinize their system against those structures.

Unlock expert guidance: Let Argano lead the way

At Argano, we're not just Dynamics 365 implementation experts, we understand your business needs.

Our accomplished team is here to guide you through the details of Dynamics 365 licensing that includes security, compliance, and more. Our seasoned experts possess the knowledge, experience, and proficiency to analyze your Dynamics 365 landscape and ascertain your license consumption standing.

We will identify potential areas for license reduction, facilitate necessary discussions on business processes, and execute essential security configurations that will aid in trimming the number of licenses needed. Once completed, you will have the insights required to procure the precise number of licenses for your business.

Argano License Optimization Services for Dynamics 365 Finance and Supply Chain Management includes:

- Clear breakdown of application specific license allocations: who's using what, how, and why

- Seamless transition of user/license pairings from legacy operations to application specific architecture

- Comprehensive documentation of security and user-role adjustments

- Training on the intricate relationship between securing and licensing

The end result? A clear, more secure, and less costly Dynamics 365 licensing framework that can deliver annual licensing savings of up to 15% or more.

Key Benefits:

- Slash licensing expenses by up to 15% or more
- Gain precise insights into license utilization
- Refine security roles and eliminate unnecessary access
- Easily remove redundant user-role assignments
