

Unified Data Platform

Turning disconnected data into an AI-ready advantage

Siloed systems, inconsistent models, and legacy infrastructure often keep enterprise data from delivering real value. Argano's Unified Data Platform changes that.

We help enterprises unify and modernize their data environments - eliminating silos, enabling real-time insights, and building a secure, scalable foundation for AI.

Built for what's next

With deep expertise in data strategy, we go beyond integration. We build intelligent, future-ready data ecosystems that power smarter decisions and faster innovation.

Our approach

Assess & Strategize

We evaluate your data landscape, identify gaps, and align on business goals - building a roadmap tailored to your needs.

Design & Implement

We deploy a cloud-native platform with unified models, governance, and compliance frameworks - designed for scale and speed.

Support & Evolve

Through managed services, we monitor, optimize, and expand your platform to support advanced analytics and AI.

Benefits

- Break down silos for real-time, end-to-end insights
- Enable predictive models, ML, and GenAI with trusted data
- Ensure quality, security, and compliance by design
- Adapt and grow with a flexible, cloud-native platform

Deliverables

Assessment & Strategy

- Current-state analysis
- Stakeholder workshops and requirements gathering
- Technology/tool selection
- Data architecture blueprint
- Finalized modernization roadmap

Design, Build & Implementation

- Cloud environment setup
- Integration process development
- Data model deployment
- API configuration

Managed Services

- Proactive monitoring and optimization
- Data quality and governance management
- Scalability and AI enablement
