

Argano Managed Services for JDE

Maximize your JDE investment with strategic support services

Argano Managed Services empower you to get more out of your JDE system to streamline business processes and enhance efficiency. Our consulting experts serve as an extension of your team, driving competitive advantage through improved business processes, industry best practices, and deep Oracle expertise. We reduce solution complexity and maintenance costs by handling functional and infrastructural design and configuration, programming and development, testing and training, and day-to-day JDE Configurable Network Computing (CNC) and system administration (DBA and OS) support.

With Argano, you gain access to experienced consulting resources covering all major JDE applications and technical areas. Our team is flexible and responsive, providing multiple points of contact to avoid any single point of failure. Our 24x7 system monitoring and emergency response options for CNC, DBA, and OS ensures minimized downtime and reduced operational risks.
