

# Unified Data Intelligence with Boomi

Transform fragmented data into a unified, AI-ready ecosystem

As businesses evolve, so do their data challenges. Siloed systems, inconsistent data quality, and disconnected processes hinder agility and readiness for AI initiatives. Argano's Unified Data Intelligence with Boomi offering helps organizations modernize their data strategy by leveraging the full capabilities of the Boomi Enterprise Platform (BEP)—an integration-agnostic solution that unifies data, systems, and workflows to prepare for scalable, intelligent operations.

We empower your organization to break down data silos, streamline operations, and build the foundation for future AI investments.

## Our Approach

### Assessment & Strategy

Review existing Boomi usage and align with business goals to identify optimization and expansion opportunities.

### Design, Build & Implementation

Architect and deploy robust integration and data management solutions that maximize platform value.

### Managed Services

Provide ongoing support, enhancements, and governance to ensure lasting value and flexibility as business needs evolve.

## Deliverables

**Comprehensive BEP assessment and review** to evaluate current usage and identify untapped capabilities.

**Platform enhancement roadmap** outlining new features, integration improvements, and AI enablement strategies.

**Design and implementation** of scalable data integration, automation, and data management solutions.

**API and governance frameworks** to ensure secure, compliant, and efficient data flows.

**Ongoing managed services** for optimization, platform support, and continuous innovation.

## Benefits

- Unify systems and data across ERP, applications, and services with a centralized Boomi-powered platform
- Enhance data quality, security, and governance with built-in data management features
- Enable future AI readiness with a platform designed to support scalable, intelligent capabilities
- Increase agility and reduce integration overhead through API and process automation
- Leverage platform-agnostic approach that adapts to evolving application landscapes and organizational needs
