

SAP APO to IBP Migrations

Make the leap to next-gen planning with confidence and speed

With SAP ending support for Advanced Planning and Optimization (APO) in 2027, now is the ideal time to transition to SAP Integrated Business Planning (IBP). By migrating to IBP, you gain access to advanced planning capabilities that drive your business forward, while minimizing risk associated with using an unsupported platform.

SAP IBP provides integrated, cloud-based planning across demand, supply, inventory, and finance. The solution delivers standardized data models, real-time scenario planning, and regular feature updates, making it a more flexible and scalable alternative to legacy solutions.

Start your migration journey today. We support you every step of the way – from planning and design to deployment and ongoing support – ensuring a seamless transition to SAP IBP and alignment with SAP's future roadmap.

Flexible, tailored paths to IBP success

Avoid one-size-fits-all approach by selecting a migration path tailored to your business goals, systems, and planning maturity. As an existing SAP APO user, you are already at an advantage. We can help you migrate faster due to:

- **Faster adoption:** Your familiarity with SAP APO's planning tools reduces the learning curve associated with transitioning to IBP. This existing knowledge enables your team to quickly adapt to the new system, minimizing the time and resources required for training.
- **Improved data readiness:** As an SAP APO user, you likely have cleaner and more organized master data. This simplifies the data transformation process necessary for IBP, allowing for a smoother migration and reducing the risk of data-related issues during the transition.

Prefer to transition in steps? Take a more gradual approach with phased migrations that offer a flexible and controlled pathway to SAP IBP. We support your transition by delivering incremental value for your business while minimizing risk.

Benefits

- Integrated demand, supply, inventory and finance planning
- Faster, smarter decisions with real-time data and scenario modeling
- Greater agility to respond to disruption
- Improved forecast accuracy and service levels
- Balance inventory and optimized working capital
- Scalable foundation for transformation and long-term growth

Get started with IBP today!

Argano provides the roadmap, expertise, and SAP partnership to get you there, faster and smarter. Contact us to learn more!

Custom Roadmapping

Tailored transition strategies aligned with your landscape, goals, and timelines to ensure a migration that matches your business priorities.

APO to IBP Replacement

Comprehensive migration from SAP APO to SAP IBP, covering all relevant functional areas to modernize your end-to-end planning.

APO PP/DS to S/4HANA MPS

Shifting production planning and detailed scheduling to S/4HANA's modern MPS (Material Planning and Scheduling) capabilities, optimizing your planning processes within the core ERP.

APO GATP to S/4HANA AATP

Replacement of APO's Global Available-to-Promise (GATP) with S/4HANA's embedded Advanced Available-to-Promise (AATP) for real-time inventory commitments and faster fulfillment.
