

Microsoft Dynamics 365 Business Performance Analytics

Data Transformation

Accelerate Financial Insights and Empower Your Finance Team

Our Business Performance Analytics (BPA) Adoption Engagement is designed to transform finance organizations by equipping teams with the tools, skills, and insights needed to fully leverage Microsoft Dynamics 365 and Power BI for modern financial analytics. Through a structured 4-week program, we deliver installation, tailored training, hands-on report development, and ongoing support enabling faster, data-driven decision-making and operational efficiency.

Solving Client Challenges

Finance teams today face fragmented systems, slow reporting, analytics skill gaps. Our BPA solution directly addresses these pain points by:

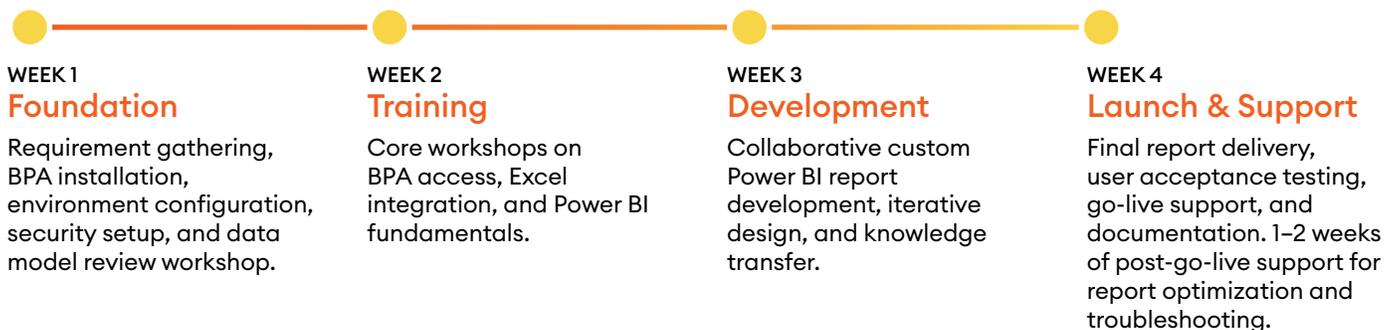

- Integrating data sources for unified, real-time reporting
- Providing hands-on training to close analytics skill gaps
- Enabling self-sufficiency in report creation and modification
- Reducing consultant reliance through knowledge transfer and co-development
- Supporting compliance and audit requirements with robust security and governance.

Key Benefits:

- **Rapid Reporting:** Achieve 50–70% faster reporting cycles and dramatically reduce manual consolidation efforts.
- **Self-Service Analytics:** Empower finance staff to independently create and modify reports in Excel and Power BI, reducing reliance on IT and external consultants.
- **Operational Efficiency:** Streamline standard financial analyses, freeing teams to focus on value-added activities like forecasting and strategic planning.
- **Secure, Native Integration:** BPA is built on Microsoft's trusted technology stack, ensuring seamless integration, enterprise-grade security, and compliance alignment.

High-Level Agenda Overview

All sessions are delivered remotely by our expert team, ensuring minimal disruption and broad participation.

Key Deliverables

BPA deployment and configuration tailored to your D365 environment

Four comprehensive training workshops (Access & Security, Data Model Overview, Excel, Power BI)

Custom Power BI report co-developed with your team

Excel integration setup and training

Documentation and best practices guide

Post-implementation support for reporting enhancements and optimization.

Next Steps

- 1 Schedule a Discovery Call**
30-minute conversation to discuss your current challenges, reporting needs, and success criteria.
- 2 Align Stakeholders**
Coordinate with CFO, Finance Directors, and IT leaders to confirm workshop dates and participants.
- 3 Kick-Off in 2 Weeks**
Begin your BPA transformation journey and see initial results within days.
- 4 Reserve Your Slot**
Limited concurrent implementations; secure your preferred start date early.

Contact us today to schedule your discovery call and download detailed program information. Most organizations complete their BPA implementation within 4 weeks, achieving rapid transformation and measurable results.
