

# From Data to Decisions

Unlock high-performance operations with AI-enabled insights

Introducing a way to transform your immense data into clarity with a subscription service that delivers proactive insights, dashboards, alerts, benchmarks, and business answers you can act on.

You have the data. You have invested in AI and machine learning capabilities. But are you getting the results you expected? Many businesses continue to be challenged with siloed systems, manual bottlenecks, and security concerns. Argano's subscription-based prescriptive insights service closes the strategy-to-performance execution gap – by unifying your data and business systems to deliver real answers that support real decisions, turning your AI investment into tangible business outcomes.

## Get more from your AI investment:

### Unified and Clean Data

Bring in data from various sources (ERP, CRM, SCM, HCM, Finance, TMS, WMS) and overlay external assets (such as IoT data and analyst benchmarks) into a cross-functional intelligence layer.

### Custom Outputs

Leverage tailored dashboards, scorecards, ROI calculators, executive playbooks, and AI-driven, prescriptive insights for review, feedback, and continuous improvement.

### High-Performance Operations (HPO)

Transform your business operations by shifting from siloed optimizations to enterprise-wide performance using AI and data orchestration.

### Scalable Delivery

Get instant access to customized insights, analysis, and expert consultation through our subscription service. Tailor your experience with modular options, available whenever you need them.

[Making this move] created the foundation for long-term success, as we were able to quickly adapt to remote work during the pandemic and turn our data into actionable insight, enabling us to build more effective customer relationships.

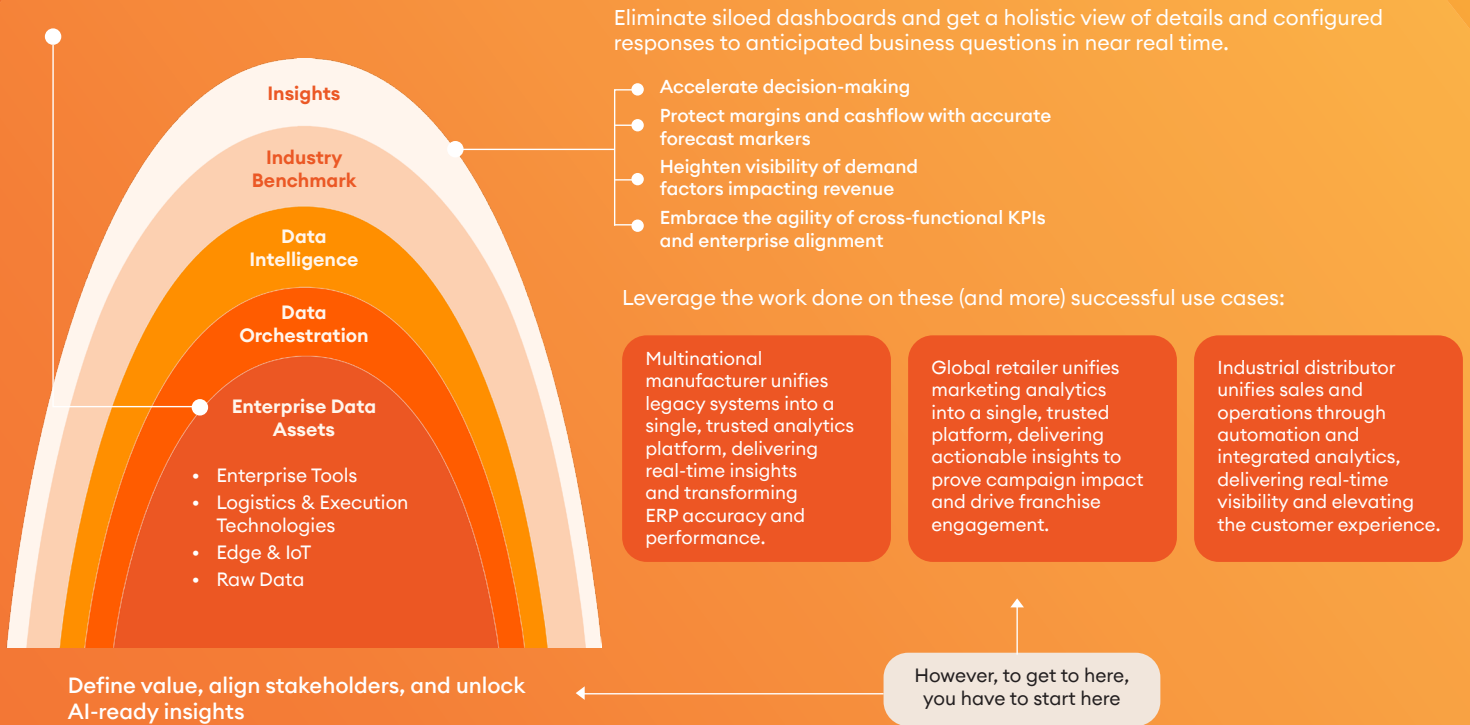

- President, major US engineered products and solutions manufacturer

## A personalized, phased approach, delivered by specialists in:

- BI, Data Sharing, and Analytics Governance
- Data Architecture
- Change Management
- AI Control Towers
- Cloud Data Storage
- Data Lakehouse Formats
- Software, Systems, and Technology Capabilities
- Industry-Specific Needs and Requirements

# From Data to Decisions

## The bedrock of this transformative effort is a phased-based strategy, kicked off by our field-proven **Insight Discovery Workshop**.

Ensuring that technology investments tie directly to business outcomes, closing execution gaps and accelerating measurable ROI.

### Purpose

- **Clarity:** Identify where AI can reduce effort, risk, or cost.
- **Alignment:** Unite crossfunctional leaders under a common framework.
- **Speed:** Identify pilots that deliver early ROI signals.
- **Scalability:** Ensure investments move from pilot to adoption and scale.

### Approach

- Fast and impactful program to align on business challenges
- Facilitated sessions to identify high-value AI and insights opportunities
- Roadmap from pilot to scale

### Deliverables

- Prioritized portfolio of AI and insights use cases.
- Clear scoring framework to evaluate future initiatives.
- Alignment across business and IT stakeholders.
- Roadmap from quick-win pilots to enterprise-wide adoption.
