

# AWS & SAP

## Accelerate SAP modernization with AWS

AWS offers a robust and mature cloud environment for running SAP workloads, enabling organizations to modernize operations through scalable infrastructure, global availability, and advanced analytics capabilities. When integrated with SAP's comprehensive ERP systems, this combination supports cost efficiency, improved system performance, and a secure foundation for ongoing innovation. Argano works at the intersection of both platforms to support seamless migrations, integrations, and modernization initiatives.

### Our Expertise in AWS & SAP

As an AWS Select Tier Services Partner and SAP Gold Partner, Argano focuses on delivering business-oriented outcomes. We design sustainable, tailored solutions that align with specific industry needs. By leveraging SAP's Plan to Operate suite on AWS, we help clients streamline processes from planning to execution, enhancing both operational efficiency and financial performance through integrated, data-driven solutions.

### Services

#### SAP Business Warehouse to AWS Redshift Migration

With SAP Business Warehouse (BW) nearing end of support, it's the right moment to modernize your data landscape by migrating to Amazon Redshift. This shift enables greater scalability, performance, and cost-efficiency through a cloud-native architecture. Argano facilitates seamless ETL processes—ensuring data integrity, regulatory compliance, and real-time analytics to support agile, data-driven decision-making.

#### SAP Migration to AWS IaaS

Migrate your SAP workloads to AWS Infrastructure-as-a-Service (IaaS) to gain flexibility, resilience, and improved operational efficiency. Whether moving ECC or S/4HANA, Argano's experts design secure, right-sized AWS EC2 environments tailored for performance and cost-effectiveness. Our proven migration frameworks ensure a smooth transition with minimal disruption—creating a scalable foundation for continuous innovation.

#### RISE with SAP on AWS

Leverage SAP's business transformation-as-a-service alongside AWS's global infrastructure and native services. RISE with SAP on AWS provides a unified, cloud-based path to S/4HANA, complete with tools, services, and process intelligence. Argano supports your end-to-end journey—aligning infrastructure, integrations, and change management to accelerate value and drive measurable results.

### Benefits

- Reduce Costs & Scale Easily with flexible, right-sized AWS infrastructure
- Boost Performance & Uptime for critical SAP workloads
- Accelerate Migration & ROI using proven tools and automation
- Strengthen Security & Compliance with AWS's trusted cloud services
- Unlock Faster Insights by integrating SAP data with AWS analytics (up to 40% faster time-to-insight)

### Industries:

- Retail
- Distribution
- Consumer Package Goods
- Manufacturing
- Healthcare & Life Sciences
- High-Tech & Telecom
- Financial Services

From RISE with SAP to S/4HANA migrations—Argano makes your AWS journey seamless. Contact us at [connect@argano.com](mailto:connect@argano.com) to get started.
