

SAP IBP Demand Planning Quick Start

Achieve global supply chain visibility and readiness in as little as 12 weeks!

Get your planners off spreadsheets and kickstart your digital supply chain transformation journey with a fixed-scope, fixed-fee implementation package from Argano. Our IBP Demand Planning Quick Start package leverages proven implementation best practices, a 12-week timeline, and a cost-effective price point, enabling your organization to invest in technology and innovate rapidly while experiencing the benefits of a market-leading SAP solution.

Typical Timeline

This project is ideal for mid-sized, growing, or high-growth organizations needing assistance with their supply chain planning processes.

Kickstart your Digital Supply Chain journey with core functionality including:

- Consensus Forecast Planning
- Baseline Statistical Models
- Product Lifecycle Planning
- Scenario Planning
- Product and/or Customer Segmentation
- Outlier Correction
- Manage by Exception (Alerts)
- Aggregation/Disaggregation

Benefits

- Improve forecast accuracy, reduce inventory, and avoid lost sales
- Streamline and automate your demand planning process with robust statistical and machine learning techniques, segmentation, and collaboration
- Monitor performance in real time and expedite decision making through visibility
- Enable scenario planning to address market-changing events
- Scale solution scope and sophistication at the pace your business grows
- Achieve rapid return on investment

Timeline & Cost:

- Implementation Time: 12 Weeks
- Implementation Cost: Fixed
