

Argano and Oracle for Construction & Engineering

Connect and optimize your resources to drive increased efficiency and profitability

A common challenge in construction and engineering is the disconnect between managing suppliers, material purchases, deliveries, costs, and billing. These processes often rely on a mix of field apps, back-office ERP systems, and spreadsheets. When project schedules change, work orders and material purchases fail to automatically update, leading to increased risks and higher costs.

Our end-to-end Oracle solutions integrate general contractors, subcontractors, financial management, construction accounting, payroll, and service operations, ensuring everything is connected and up to date.

Whether you design, build, or own and operate, we deliver advanced Oracle solutions that help you improve operational planning and efficiency with deeper insights, streamlined workflows, optimized scheduling, and everything you need to better manage your projects.

With extensive experience in Heavy Civil, General Contracting, Specialty and Linear, and EPC, we help solve your unique challenges and objectives. Whether we're guiding your complete transformation to the cloud, expanding the capabilities of your on-premises application, or delivering a hybrid approach, our solutions are tailored to meet your specific needs.

Benefits:

- Integrated resource management
- Improved planning, scheduling, and delivery
- Scalable and efficient operations
- Increased sustainability and profitability

Oracle Solution Expertise:

- Oracle Cloud Applications and Infrastructure
- Construction Intelligence Cloud
- Primavera Cloud
- Textura Payment Management
- Aconex
- JD Edwards
- E-Business Suite

Integrated Resource Management

Efficiently allocate your project resources across roles, skills, and location, ensuring optimal utilization.

Optimized Planning and Scheduling

Synchronize your field service operations and office to ensure real-time updates and seamless collaboration.

Enhanced Visibility and Insights

Enable a complete view into your financial data to drive improved project outcomes and reduce risk.

Unlock efficiency and drive innovation in your construction projects. **Contact us** to get started!
