

Argano Microsoft Fabric Pilot for Dynamics 365: Accelerating Your AI and Data Transformation

Organizations today face challenges with fragmented systems, inconsistent reporting, and isolated data silos. Argano addresses these challenges through the Microsoft Fabric Pilot Program for Dynamics 365. The Argano Fabric pilot program is a targeted, rapid implementation initiative designed to create a unified, AI-ready data environment that is the foundation of your future data estate.

Business Value Injection: Solving Common Data Challenges

Organizations often face significant hurdles integrating legacy data and multiple disparate data sources, particularly during new Dynamics 365 implementations. Argano Data Insights addresses these challenges by offering a robust data model framework. This framework seamlessly integrates legacy systems and diverse source data alongside Dynamics 365, ensuring continuous operational capability from day one. Argano Data Insights not only simplifies complex data integrations but also enables immediate analytics-driven insights, easing the transition, and maximizing value early in the implementation process.

Argano Data Insights: Transforming Your Data into Value

Argano Data Insights acts as a solution accelerator, rapidly transforming Dynamics 365 data into meaningful, actionable insights. Our deep expertise and experience with the Dynamics data model and cross-industry implementation experience enable us to optimize your operations, delivering tailored, AI-driven outcomes.

Key Benefits of the Argano Microsoft Fabric Pilot Program:

- **Unify data:** Consolidate your Dynamics 365 data, including CRM/Dataverse, Finance and Operations, and other business-critical information into one secure, governed, and integrated platform.
- **Modernize reporting:** Automate and streamline reporting processes, empowering your team with self-service analytics to enhance decision-making.
- **Accelerate insights:** Quickly gain actionable insights from your financial, operational, and sales data, reducing the time to value from months to weeks.
- **Enable AI foundations:** Establish a unified data environment that positions your organization for future AI, ML, and Microsoft Copilot initiatives.
- **Enhance governance:** Leverage enterprise-grade governance and compliance to ensure data integrity and security throughout your data estate.
- **Build roadmap:** Create a clear, scalable strategy for future growth, AI innovation, and enterprise-wide analytics adoption.

Unified enterprise-wide data for
a hyperconnected business

By utilizing Argano Data Insights accelerators, you gain:

- **Reduced time to insight:** Leverage an optimized framework and enterprise-grade data model specifically designed for Dynamics business applications. This foundation significantly reduces the time, effort, and complexity traditionally required to gain meaningful analytics, enabling your organization to rapidly transform data into actionable insights and faster strategic decision-making.
- **Managed risk:** Proactively identify and mitigate potential data, security, and operational risks with enhanced visibility and controls.
- **Industry-specific understanding:** Leverage extensive industry experience, ensuring analytics and AI models are tailored specifically to your industry's nuances and business challenges.
- **Trusted systems grounded in data security and compliance:** Implement robust, secure, and compliant data solutions that maintain integrity and reliability across your organization's entire data estate.
- **Outcome-focused solutions:** Ensure each initiative directly aligns with your strategic business objectives, delivering measurable results and impactful business outcomes.
- **Realignment of core business processes:** Adapt and refine your core business processes through data-driven insights, fostering organizational agility and continuous improvement.
- **High-performance business operations:** Streamline and enhance business processes with optimized data flows and AI-driven insights to significantly boost operational efficiency and effectiveness.

Implementation Overview: How We Work

The Argano Fabric Pilot adopts a focused, business-process-centric approach:

- Quickly demonstrates and validate values by targeting singular business process to drive immediate improvements
- Aligns closely with existing business processes to ensure relevance and direct impact
- Avoids the complexity and risks associated with large-scale implementations, emphasizing incremental and measurable outcomes

Our hybrid engagement methodology combines structured phases for clear governance with agile development for rapid results:

Phase 1 Initiation & Design

- Identify goals
- Define data architecture
- Prepare environment

Phase 2 Build

- Build rapid Fabric environment
- Ingest Dynamics 365 data
- Apply Argano Data Insights - Accelerators
- Create robust analytics dashboards and visualizations

Phase 3 Deployment

- Validate deployment readiness
- Conduct team training
- Develop comprehensive roadmap
- Prepare Fabric for Dynamics executive overview
- Present strategic roadmap

Looking Ahead: Scaling Your Data & AI Transformation

The Fabric Pilot is your gateway to a broader, transformative journey:

- Develop an enterprise-wide Fabric adoption roadmap
- Establish a Fabric Center of Excellence (CoE) for sustainable governance and operational success
- Scale advanced analytics, AI-driven processes, and foster a self-service analytics culture across your organization

Argano's data intelligence capabilities span comprehensive data modernization, intelligent analytics, generative AI, and strategic advisory:

Data Architecture Intelligence:
Modernize your data estate and integrate your data efficiently and securely

Analytics Intelligence: Harness advanced analytics, machine learning, and predictive insights to enhance business performance

Generative AI & Copilot Intelligence:
Leverage AI-driven automation, conversational AI, and embedded intelligence solutions

Strategy & Advisory Intelligence: Develop clear strategies, unified data estates, and cloud foundations guided by Azure best practices

Maximizing Your Microsoft Investment: Comprehensive Cloud Expertise

Argano designs and delivers comprehensive Cloud Intelligence solutions across multiple domains leveraging Microsoft Cloud tools and technologies. We empower your organization to effectively adopt and architect the right Microsoft Fabric solution for your unique Dynamics 365 environment, unlocking enhanced business agility and intelligent data-driven decisions.

Contact us today to start your Microsoft Fabric and Dynamics 365 journey and unlock the full potential of your enterprise data intelligence.

About Argano

Argano is the world's first and largest digital services consultancy focused exclusively on enabling high performance across our clients' business operations, at scale and around the globe. Forged from world-class specialist consultancies with decades of enterprise technology, data, cloud, AI and operations expertise, Argano supports the full transformation agenda through strategy, design, execution, and ongoing managed services. We modernize and optimize core functions across customer engagement and service, revenue management, finance and planning, supply chain, and workforce optimization. Our promise to clients is maximizing their growth, profitability, commercial agility and customer satisfaction, guaranteed. Learn more at www.argano.com.
