

Realize Redwood with Argano

We can help jumpstart your transition to Oracle Redwood

Oracle’s Redwood platform is much more than a new look and feel for your Oracle Cloud Applications. Redwood is Oracle’s go-forward user interface framework, providing streamlined persona-based experiences, faster page performance, and natively embedded intelligence.

Benefits

- Embedded generative AI including suggestions and summaries, intelligent nudges, next best actions, and new Contextual Journeys
- Centers for employees and managers to organize all activity in one place
- A modern UI experience across all Oracle Cloud Applications
- New functionality with Visual Builder Express Business Rules over
- Transaction Design Studio (ex. Page preview, more robust field controls)
- Compatible with modern browser technology to enable innovative page design with third party tools (ex: Google Translate plugin)

Many new Oracle capabilities are Redwood-only, including Journeys, Benefits Calculators, Dynamic Skills, Opportunity Marketplace, Touchpoints, and Grow.

Multiple, fixed-price models:

How Argano can help you with Redwood	Advisement Model	Transition Model
