

AWS and SAP

Accelerating SAP transformation on AWS

Argano unites the power of SAP and AWS to accelerate innovation, scalability, and performance. With deep expertise across both platforms, we help organizations modernize their SAP environments on AWS—driving speed, efficiency, and agility through a single, unified approach.

AWS delivers a secure, scalable foundation for SAP workloads, while SAP's powerful ERP capabilities provide the intelligence to transform operations and fuel continuous improvement.

As a trusted end-to-end partner, Argano bridges strategy, migration, integration, and optimization to help enterprises realize the full value of SAP on AWS.

SAP Workload Migration and Modernization

On-Prem to Cloud Migration

- SAP landscape assessment & sizing
- TCO & compliance analysis
- Lift-and-shift or re-platform SAP workload from on-premise to AWS
- GROW with SAP for kickstart S/4HANA on prem to cloud journey fully hosted on AWS

Managed Operations

- RISE with SAP platform services, including migration, back-up and DR
- Administration, security, monitoring, cost optimization
- End-to-end cloud application services (CAS) services on AWS

Integration and Innovation

- Extend SAP business processes with AWS Data & AI services
- API-led integrations with SAP BTP and external custom APIs on AWS
- Custom extensions on serverless & containers

Get started today! Contact us at connect@argano.com to accelerate your SAP journey on AWS.

Benefits

- **Enhanced Agility and Scalability:** Accelerate SAP migrations and scale seamlessly with AWS elasticity and automated cloud platform support
- **Cost Efficiency:** Optimize infrastructure and operations spend using AWS-native tools and intelligent workload management
- **Unlock Innovation:** Extend SAP capabilities with AWS Data, AI, and IoT services to drive smarter insights and continuous transformation
- **End-to-End Partnership:** Leverage Argano as your single partner for both AWS and SAP strategy, implementation, and ongoing support

Deliverables

- Cloud Readiness & TCO Report
- Migration & Modernization Roadmap
- Configured SAP workloads on AWS
- Integration blueprints with AWS services
- Managed operations playbook (DR, HA, Monitoring)
- Monitoring and performance reports
- Training and documentation
