

Argano for E-Business Suite on Oracle Cloud Infrastructure

Maximize your EBS solution in the cloud

Oracle E-Business Suite 12.2 Premier Support has been extended through at least 2035, and our team of experts is here to help you maximize the power of Oracle Cloud Infrastructure (OCI) for your essential EBS applications. Leverage OCI to help you run your application faster, more securely, and economically.

What you get from running EBS on Oracle Cloud Infrastructure (OCI)

- **Consistent performance:** Extensive testing of EBS features on OCI to ensure optimal performance
- **Reduced risk and enhanced support:** Close collaboration between EBS and OCI product teams for faster issue resolution and minimized disruption
- **Coordinated enhancements:** Roadmap alignment between EBS and OCI teams to optimize EBS effectively on OCI
- **Optimized Oracle workloads:** Increasing system availability, reducing unplanned downtime, and providing robust security
- **Oracle-engineered systems for EBS performance:** Oracle Exadata and Autonomous Database in-memory capabilities for concurrent workloads
- **Seamless OCI adoption:** No reskilling required for end-users and IT teams, ensuring efficient transition
- **Comprehensive SLAs:** Covering availability, manageability, and performance

Benefits:

- Flexible, scalable platform for managing enterprise systems and data
- Improved security and continuous updates
- Enhanced data insights and high-performance growth enabled by AI and cloud infrastructure

Argano Expertise:

- Industry experience and best practices
- 25+ years of Oracle partnership
- 55+ awards for excellence

2024 Oracle Partner Awards Winner
