

SAP Supply Chain Roadmap Assessment

Build a roadmap and business case for your future state in as little as 5 weeks!

One of the most challenging phases of advancing your supply chain capability is getting organizational buy-in, executive support, and budget for the program. Critical to this exercise is understanding where the business value lies, what it means to various stakeholders, and what improvements will drive the highest returns to help the project pay for itself. Argano has conducted hundreds of Roadmap Assessments for some of the world’s most recognized companies. We tailor our process and scope to ensure you get the answers you need. Additionally, we can provide throughput-based profitability, advanced inventory analytics, surveys, and benchmarking to give you detailed benefits of a market-leading SAP solution.

Typical Timeline

This assessment is ideal for organizations with fragmented systems, processes, value streams, and companies needing help defining a detailed, organizationally supported supply chain planning roadmap.

Kickstart your Digital Supply Chain journey with a clear business case including:

- Bottoms-Up Business Value
- Detailed Project Roadmap
- Critical Dependencies
- Organizational & Data Constraints
- Segmentation Analysis
- Key Opportunities & Risks
- Change Impact Analysis
- Tailored To-Be Business Process Framework

Benefits:

- Leverage a supporting business case developed by ex-industry SCM practitioners and technology experts
- Advance your supply chain capability with a realistic, practical, business-supported roadmap
- Achieve real value estimates from your business and data to drive ROI
- Gain valuable insights into gaps and supply chain risk to mitigate disruption
- Understand critical dependencies and change impacts to ensure successful execution

Timeline & Cost:

5-8 Weeks
Assessment Time

\$50K-\$150K
Assessment Cost
