

Scale Innovation

with Microsoft's comprehensive low-code platform and Argano's governance services

Join organizations that successfully increased visibility, control and management of data, applications, automations, and AI through the Microsoft Power Platform.

81%

Improved IT Governance

91%

Increased security and/or visibility around data connections

1. The Total Economic Impact™ of Microsoft Power Platform Premium Capabilities is a 2022 commissioned study conducted by Forrester. Consulting on behalf of Microsoft Corporation. Results are over three years for a composite organization based on interviewed customers.

Not just for the sake of control

Maximizing your current investment in Power Platform – from Copilot Studio to Power Pages, requires having a handle on all the ways your organization is taking advantage of the low/no-code platform – understanding the value, it's scope, and solution details. This workshop will provide you with key insights to support consolidating efforts, improving quality of solutions and scaling to have the most reach.

Foundations for Future Innovation

Establishing trust and control in Power Platform now will be critical for any future innovation. Now more than ever it is clear that governance, security, and business alignment are prerequisites for successful, app modernization, and enterprise efficiencies.

1. Argano Power Platform Governance & Security Two-Week Workshop

2. Establish a Center of Excellence to scale success

3. Reduce risk and ensure compliance

Our governance and security services are built on the following principles: customer control, transparency, security, defending data from third party access, no content-based targeting, and compliance with relevant laws and regulations.

Environment Strategy

Govern and scale environments with standardized frameworks.

Security & Authentication

Secure access with trusted identity and connection protocols.

Application Lifecycle Management (ALM)

Align ALM strategies to user roles across business and IT.

Request Management

Operationalize app, process, and environment requests at scale.

Analytics & Reporting

Monitor usage and gain insights with built-in analytics.

Data Loss Prevention (DLP)

Enforce compliance and prevent data leakage with DLP policies.

Next Steps

Contact us at microsoft@argano.com to learn more about our two-week Governance and Security Workshop and show the value of the Power Platform solution to stakeholders before committing significant resources to a full-scale implementation. Develop mission-critical, enterprise-grade solutions at scale and integrate those solutions where your end users already work today.
