

Boomi and Blue Yonder Integration Accelerator

Prebuilt integration foundation to accelerate supply chain modernization, improve data flow, and speed time-to-value

Organizations rely on Blue Yonder to power advanced warehouse and supply chain operations and on Boomi to connect enterprise systems and data across the digital ecosystem.

The Argano Boomi + Blue Yonder Integration Accelerator brings these platforms together through a preconfigured, enterprise-ready integration framework that accelerates deployment, simplifies connectivity across ERP systems and trading partners, and establishes a scalable foundation for long-term growth. This accelerator helps organizations maximize their Blue Yonder investment while leveraging Boomi to build a connected, agile, and future-ready supply chain.

Our Approach

Prebuilt Integration Assets

- Configurable Boomi processes for creating, updating, and extracting Blue Yonder data
- Reusable connection components for Blue Yonder, ERP platforms, and external endpoints
- Standardized data models aligned to common Blue Yonder transactions

Hybrid Integration Foundation

- API-ready integration patterns for application and customer-facing use cases
- EDI-ready patterns for trading partner and B2B integrations
- Parameterized properties for environment portability and rapid configuration

Deployment Options

Option 1: Blue Yonder API Bundle

Expose Blue Yonder WMS data through secure APIs for applications, analytics platforms, and partner integrations.

Option 2: Blue Yonder Integration Bundle (API + EDI)

A comprehensive integration foundation connecting Blue Yonder, ERP, and external trading partners using hybrid API and EDI patterns.

Benefits

- **Accelerated Time-to-Value:** Rapidly deploy Blue Yonder integrations using prebuilt, configurable patterns that shorten implementation timelines.
- **Unified, Scalable Integration Architecture:** Establish a standardized foundation that supports APIs and EDI while reducing point-to-point integrations.
- **Improved Data Flow & Visibility:** Enable consistent, reliable movement of supply chain data across ERP systems, partners, and downstream applications.
- **Lower Risk & Total Cost of Ownership:** Reduce custom development and simplify long-term maintenance through reusable, governed integration assets.

Common Use Cases

- Orders & Fulfillment
- Returns & Cancellations
- Inventory Management
