

Scale *Innovation*

with Microsoft's comprehensive low-code platform and Argano's governance services

Join organizations that successfully increased visibility, control and management of data through the Microsoft Power Platform.

81%

Improved IT Governance

91%

Increased security and/or visibility around data connections

1. The Total Economic Impact™ of Microsoft Power Platform Premium Capabilities is a 2022 commissioned study conducted by Forrester Consulting on behalf of Microsoft Corporation. Results are over three years for a composite organization based on interviewed customers.

1 Argano Power Platform Governance & Security Two-Week Workshop

2 Establish a *Center of Excellence* to scale success

Establish a Center of Excellence early on is key to rapidly adopting Power Platform and deploy solutions. Identify a team that is responsible for driving governance, best practices, and adoption within your organization.

3 Reduce risk and ensure *compliance*

Our governance and security services are built on the following principles: customer control, transparency, security, defending data from third party access, no content-based targeting, and compliance with relevant laws and regulations.

- Encryption**
Enhance security by encrypting your data within Power Platform and easily manage encryption keys.
- Field-Level Security**
Explore field-level security to control access to specific fields in your data.
- Security and Authentication**
Understand how authentication works within the Power Platform ecosystem and the different mechanisms for connecting and authenticating to data sources.
- Analytics and Reporting**
Leverage Dataverse analytics and Power Apps analytics to monitor and track usage and gain insights into your Power Platform environment.
- Environment Security**
Configure environment security to control access and permissions within different environments.
- Data Loss Prevention (DLP) Policies**
Create, implement and manage DLP policies to prevent data leakage and enforce compliance.

4 How *Power Platform* has helped a major organization

Group O's onboarding process was taking up to four weeks. Now with its new Microsoft low-code application and Dynamics 365, they optimized their process to as little as three days: **a productivity increase of 80%**.
