

Argano Inspection Management

Transform inspection into insight

Argano Inspection Management is a Power Platform-based accelerator that digitizes inspection operations. It provides a unified, mobile-enabled platform for planning, conducting, and managing inspections, ensuring consistency, efficiency, and accountability across all departments and locations. Fully adaptable for any inspection type, from safety and quality assurance to facilities, maintenance, and operational audits, it enables teams to standardize templates, automate scheduling, and streamline reviews with complete visibility.

Why Choose Argano Inspection Management?

Organizations with recurring inspections, audits, or compliance checks across multiple sites or teams face challenges with manual processes, fragmented tools, and limited visibility. Argano Inspection Management solves these problems by providing a single, adaptable solution that streamlines operations, improves accountability, and accelerates digital transformation.

Week 1	Week 2
Kickoff and scope confirmation	Use case ideation and prioritization
As-is process mapping	Future-state design
Pain point analysis and voting	Roadmap and solution blueprint
Technology education and demos	Executive presentation

Engagement can be extended for advanced customization, reporting, dashboards, alerts, automations, and integrations.

Ready to transform your inspection operations? Contact us today at microsoft@argano.com to schedule a live demo or discuss your specific use case. Our team helps you select a pilot process and launch your solution in just weeks.

Benefits

- **Standardize Processes:** Reusable templates and workflows ensure consistent inspections
- **Empower Field Teams:** Mobile-friendly apps for real-time data capture
- **Increase Visibility:** Centralized dashboard for inspection results and compliance trends
- **Reduce Manual Effort:** Automated scheduling and reporting minimize administrative overhead
- **Rapid Deployment:** Accelerator model delivers results in weeks, not months
- **Scalable & Secure:** Built on Microsoft Power Platform for low-code scalability and enterprise-grade security

Key Deliverables

- Installed Argano Inspection Management solution
- Configured templates and workflows
- Branded application interface
- Solution blueprint and executive summary
- Optional: Custom dashboards, alerts, integrations
