

SAP Extended Warehouse Management

Smarter, faster, stronger warehouse execution

Your warehouse is more than a storage facility, it is an integral part of your supply chain that must operate with speed, precision, and adaptability. SAP Extended Warehouse Management (EWM) helps you take full control of warehouse operations, integrating everything from goods receipt to outbound delivery. Whether embedded in SAP S/HANA or deployed as a decentralized sidecar, SAP EWM delivers the flexibility, speed, and intelligence required to modernize warehouse execution.

Argano brings deep experience in SAP supply chain and logistics to help you maximize your investment. With a clear roadmap and scalable deployment options, we help clients rapidly unlock value - transforming warehousing from a cost center into a competitive advantage.

Capabilities

Warehouse Execution

Streamline every process from goods receipt to outbound delivery, including cross-docking, returns, and optimized task execution.

Picking & Fulfillment

Accelerate order fulfillment with wave and multi-order picking, pick-by-voice/light technology, and configurable packing specifications.

Deployment Flexibility

Deploy EWM as an embedded module in SAP S/HANA or as a decentralized sidecar, with scalable options as your operations grow.

Automation & Optimization

Integrate with conveyors, robotics, and AS/RS systems while configuring complex layouts, zones, storage types, bins, work centers, and activity areas.

Visibility & Resource Management

Gain real-time insights into inventory, labor, and equipment utilization with dashboards, mobile access, and embedded analytics.

Yard & Dock Control

Manage inbound and outbound logistics with scheduled dock appointments, truck and trailer movements, and check-in/check-out processes.

Benefits

- Boost efficiency with automation and smart execution
- Reduce costs through space optimization and labor savings
- Gain real-time visibility into inventory and resources
- Scale operations with flexible deployment options
- Accelerate order fulfillment with more accurate picking and shipping
- Improve compliance with end-to-end traceability
