Tableau Pulse

Unlocking the power of data with AI-driven insights

With AI-powered capabilities, Tableau Pulse automatically detects drivers, trends, contributors, and outliers for the metrics you follow, providing you with valuable insights without the need for manual analysis.

With strategic guidance, we help get your data ready to work seamlessly with Tableau Pulse, to ensure that you have the right metrics, best practices, and plan in place to maximize the value of this powerful platform. Together, Tableau Pulse and Argano provide a comprehensive solution to streamline your data analysis and decision-making processes that enable improved outcomes for your business.

Our Approach

Assess & Prepare

We begin by aligning on the business goals and metrics that matter most. Our team evaluates your current data landscape, identifies gaps in metric readiness, and ensures your environment is primed for Tableau Pulse implementation.

Activate & Guide

With a focus on speed to insight, we help configure Tableau Pulse to track the right KPIs, automatically detect drivers and anomalies, and deliver real-time alerts in the flow of work. Our experts guide your teams through best practices to interpret and act on AI-powered insights.

Optimize & Scale

Once Pulse is live, we stay engaged to fine-tune metrics, evolve data pipelines, and scale the platform across business units. We help you continuously extract more value from Tableau Pulse as your decision-making needs grow more complex.
