EPM Cloud Readiness Assessment

Charting your migration path from on-premises to the cloud

As more companies adopt cloud-based applications that modernize processes to gain agility, scalability, and reduce customization, businesses are seeking guidance for a strategic cloud migration roadmap that optimizes their technology investments. They want to know which existing processes within their unique Enterprise Performance Management (EPM) and Analytics applications align to cloud capabilities, which ones do not, and what new features can drive targeted changes and enhancements. To confidently plan for the future, it is essential to have an individualized and comprehensive understanding of migration requirements.

Our team of experts evaluates your current setup and guides you in creating a strategic transition path to the cloud. Through our EPM Cloud Readiness Assessment, we analyze your EPM and Analytics applications and develop robust migration plans for key areas including:

- Planning and Budgeting
- Forecasting
- Scenario Modeling
- Close and Consolidations
- Reporting and Analysis
- Data Governance

Benefits:

- Understand how on-premises systems compare to cloud applications
- Develop a clear strategy and roadmap for moving to the cloud
- Discover opportunities for streamlining financial processes
- Educate in-house Hyperion experts to capitalize on new features in Cloud EPM applications
- Explore additional processes available within Cloud EPM Enterprise licensing

Applications Innovation

The EPM Cloud Readiness Assessment includes

Evaluation:

- Strategic information gathering from stakeholders to determine desired migration outcomes
- Review of current architecture, processes, and systems
- Inventory of administrative support and development practices

Recommendations:

- Required changes to achieve expected results
- Modern best practices to adopt as part of new development
- Training plans to empower administrators for a seamless transition to the cloud

Deliverables:

- Feature-by-feature mapping of on-premises to cloud capabilities
- Breakdown of what can migrate as-is, what must change, and opportunities for enhancement
- Analysis of migration options: lift-and-shift, move-and-improve, or application rebuild
- View of future-state architecture, including ground-to-cloud integration

Common reasons for a Cloud Readiness Assessment:

Understand the level of effort and time required for migration

Enable innovative features that only exist in the cloud

Identify potential cost savings associated with IT departments migrating or retiring existing data centers and servers

Develop a comprehensive RFP for migration project

Get started today!
When you are ready to chart your course to the cloud, assess the extent of change required, and learn which components of your current solutions can (and should) migrate, rely on Argano to guide you in determining your best path forward.
